Defending at the Speed of Threats:

Intelligence-Driven Cyber Operations and Digital Risk Protection

Recorded Future

What it is:
A solution to turn external intelligence into proactive cyber defence

Cybersecurity Leaders

Enterprise Risk Leaders

Fraud & Financial Crime Leaders

Anticipate relevant threats and act earlier through intelligence-led protection across critical risk domains.

Why it matters

AI is accelerating vulnerability discovery and exploitation, while unseen threats can cause financial loss, operational disruption, reputational damage and compliance failure. Recorded Future connects external intelligence with organisational context, helping teams identify relevant threats earlier and take analyst-controlled or autonomous action before threats become incidents.

© 2026 KPMG Services Pte. Ltd. (Registration No: 200003956G), a Singapore incorporated company and a member firm of the KPMG global organization of independent member firms affiliated with KPMG International Limited, a private English company limited by guarantee. All rights reserved.

What it does:
Accelerate intelligence-led cyber decisions

Prioritise relevant threats
Focus resources on material exposure.

Operationalise intelligence
Accelerate detection, investigation and response.

Automate defensive workflows
Respond at machine speed.

Sustain intelligence-led operations
Continuously improve cyber capability.

Benefits

- Earlier identification of relevant threats
- Stronger visibility across four risk domains
- More sustainable intelligence-led security operations

How it does it: Demo

Input

Organisational assets, priority use cases, existing workflows and relevant external threat intelligence.

Action

The platform correlates threats with the organisation’s environment while KPMG integrates, operationalises and governs intelligence-led workflows.

Output

Prioritised insights, enriched investigations, updated detections, playbooks and actionable reporting.

Impact

Identify, investigate and respond to relevant threats earlier while strengthening long-term capability.

Explore intelligence-led defence before threats become incidents

Discover how external intelligence can strengthen decisions and action across cyber operations, digital risk, third-party risk and payment fraud.

Consider a discussion if you are:

- Strengthening proactive threat detection and response
- Monitoring external, brand or supplier exposure
- Advancing towards agentic and autonomous workflows

Request a consultation to turn threat intelligence into sustained cyber outcomes.

Recorded Future Provides the Intelligence. KPMG Delivers the Outcomes.

A joint proposition that combines external threat intelligence with implementation, operationalisation and sustained capability uplift.

INTELLIGENCE TO OUTCOMES

RECORDED FUTURE

External intelligence and autonomous detection

1. Intelligence platform and feeds
2. Early identification of relevant threats
3. Autonomous threat insights and enrichment
4. Integration with existing security workflows

KPMG

Advisory, implementation and operationalisation

- ✓ Define operating model and priority use cases
- ✓ Integrate into SOC, IR and risk processes
- ✓ Build playbooks, workflows and governance
- ✓ Train teams and support managed operations
- ✓ Measure outcomes and improve maturity

From Platform Deployment to Sustained Intelligence-Led Operations

A structured journey to embed Recorded Future across technology, processes and teams.

01

DEPLOY

- Implement and configure the platform
- Integrate SIEM, EDR, SOAR and ticketing
- Tune intelligence and establish baselines

02

OPERATIONALISE

- Develop intelligence-led use cases
- Build triage, hunting and risk workflows
- Establish reporting and governance

03

MATURE

- Assess program and operating model
- Advance SOC and automation use cases
- Expand proactive threat hunting

04

SUSTAIN

- Provide managed or co-managed services
- Continuously tune and optimise
- Track performance and capability uplift

KPMG supports the journey from initial value realisation through long-term capability development.

The Partnership Converts Intelligence into Sustainable Cyber Outcomes

Technology, operating model and specialist support combine to create lasting capability.

01 Accelerate adoption

Shorten the path from platform deployment to usable security workflows.

02 Operationalise intelligence

Embed intelligence across people, processes and existing technologies.

03 Enhance visibility

Strengthen cyber operations and monitoring of external digital risk.

RECORDED FUTURE + KPMG

Intelligence-led security capability

04 Improve response

Support more informed detection, investigation and response decisions.

05 Build sustainable capability

Continuously tune, govern and mature the intelligence-led program.

Outcome: a scalable intelligence-led security program that moves from insight to action.

Risk Recon

What it is:
A service to build and sustain stronger third-party risk management

Third-Party Risk Managers

Enterprise Risk Leaders

Information Security Risk Teams

Manage third-party risk through integrated governance, processes and risk intelligence.

Why it matters

Expanding digital ecosystems increase reliance on interconnected suppliers, cloud providers and SaaS platforms, creating vulnerabilities across extended supply chains. Limited visibility, inconsistent security requirements, concentration risk and weak incident preparedness make informed oversight difficult. Organisations need a structured, scalable capability to identify, prioritise and manage third-party risks before they disrupt operations or weaken cyber resilience.

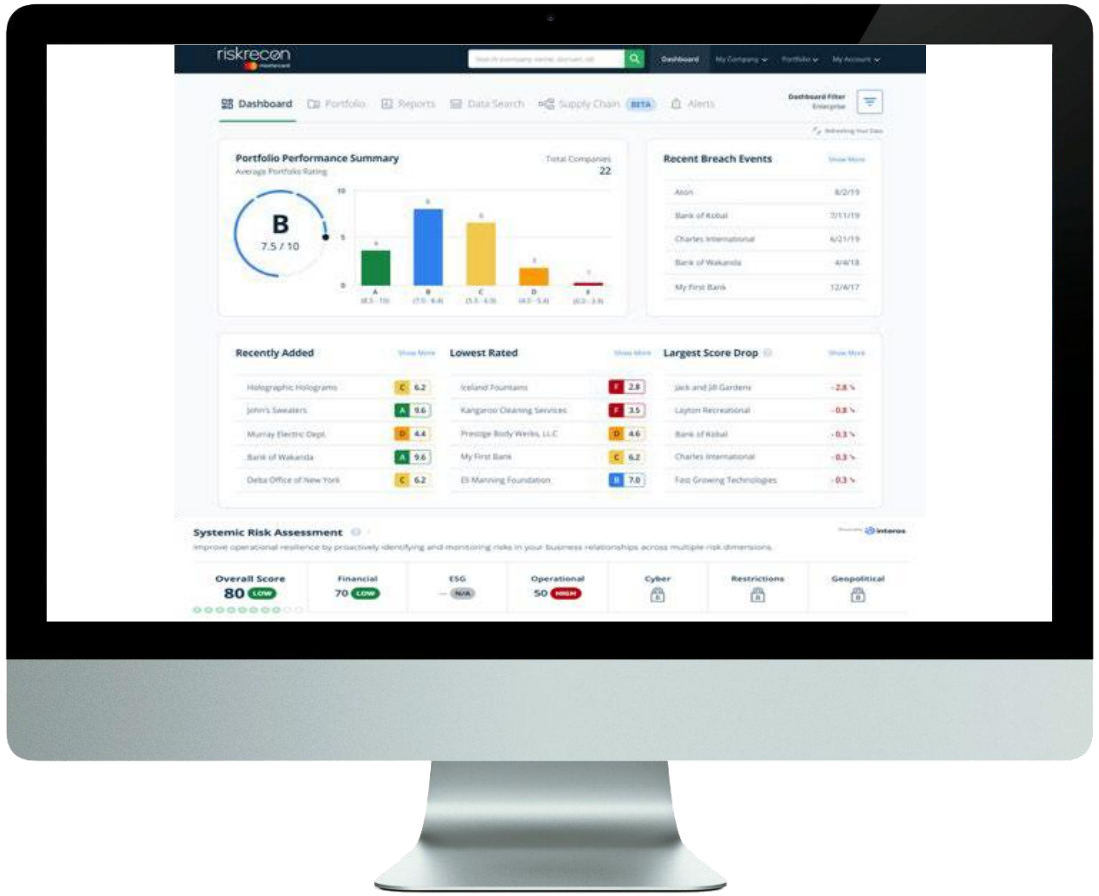
© 2026 KPMG Services Pte. Ltd. (Registration No: 200003956G), a Singapore incorporated company and a member firm of the KPMG global organization of independent member firms affiliated with KPMG International Limited, a private English company limited by guarantee. All rights reserved.

What it does:
Turn third-party risk insight into sustained control

Reveal the extended risk landscape
Identify, classify and prioritise third parties based on risk and business criticality.

Embed governance and accountability
Align roles, processes, controls and decision-making across the third-party lifecycle.

Strengthen the operating model
Sustain consistent execution, performance oversight and continuous improvement at scale.



Benefits

- Faster, risk-informed third-party decisions
- Consistent governance across business functions
- Proactive response to emerging exposures

© 2026 KPMG Services Pte. Ltd. (Registration No: 200003956G), a Singapore incorporated company and a member firm of the KPMG global organization of independent member firms affiliated with KPMG International Limited, a private English company limited by guarantee. All rights reserved.

How it does it: Demo

Input

Current TPRM practices, third-party information, business needs and future-state ambitions.

Action

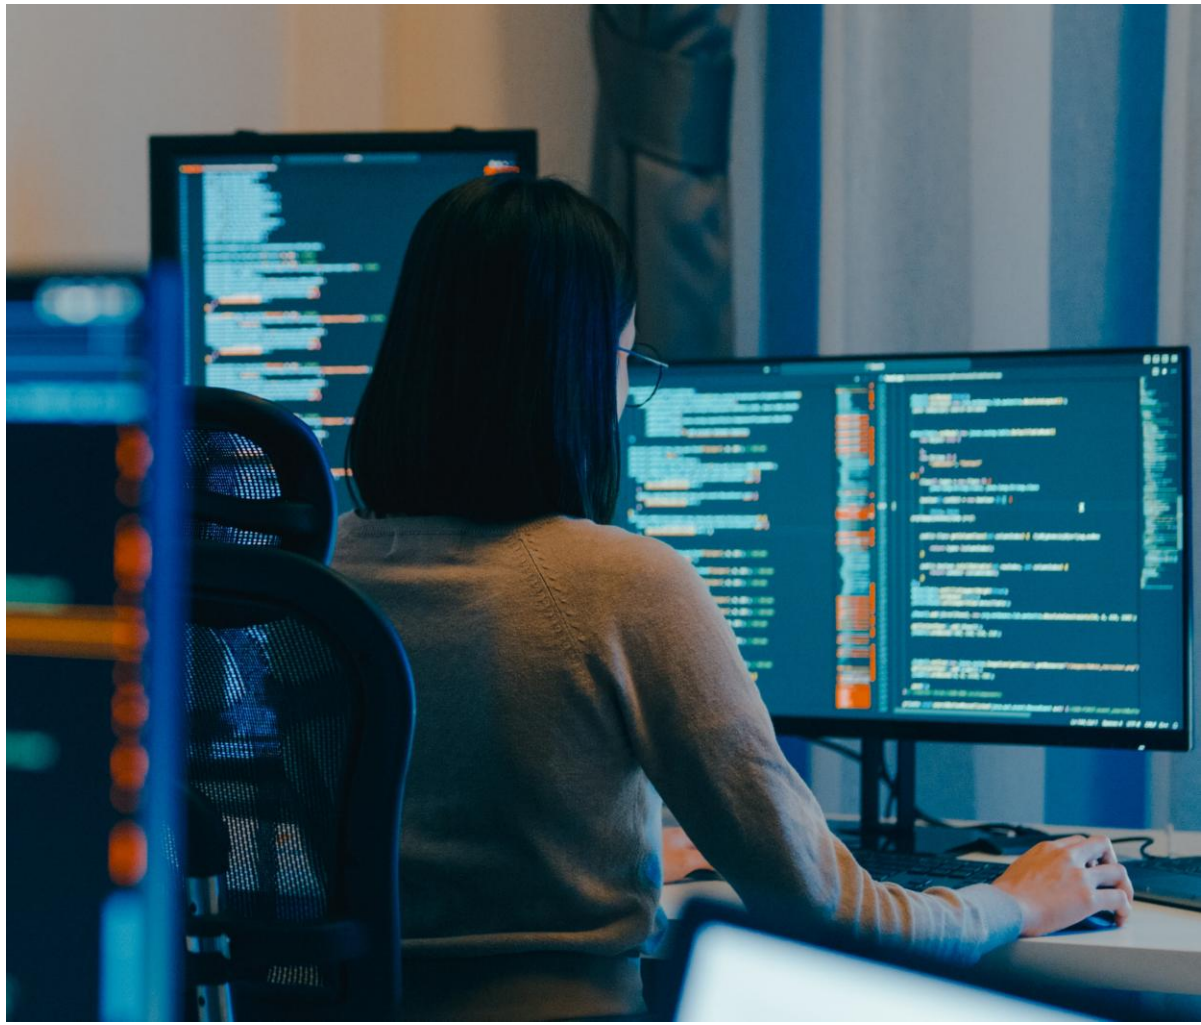
Assess maturity, establish a risk-based register, define governance and operationalise monitoring and response processes.

Output

A tailored roadmap, third-party register, operating model, risk insights and continuous monitoring capability.

Impact

Faster decisions, clearer accountability and stronger control across the third-party lifecycle.



© 2026 KPMG Services Pte. Ltd. (Registration No: 200003956G), a Singapore incorporated company and a member firm of the KPMG global organization of independent member firms affiliated with KPMG International Limited, a private English company limited by guarantee. All rights reserved.

Explore stronger control over third-party risk

Discover how to build a scalable, data-driven TPRM capability with clearer governance, actionable risk intelligence and sustained oversight.

Consider a discussion if you are:

- Building or strengthening a TPRM capability
- Addressing limited visibility across third and fourth parties
- Operationalising continuous monitoring, response and improvement

Request a consultation to make third-party risk visible and actionable.
