SAP Security with SecurityBridge

Continuous visibility and protection for critical SAP systems

What it is:
A solution to continuously protect critical SAP business operations

SAP Security Leaders

Vulnerability Management Teams

Risk & Compliance Leaders

Close SAP security gaps through continuous visibility, threat detection and risk-based remediation.

Why it matters

SAP threats do not wait for the next review or patch cycle. Without continuous visibility, vulnerabilities, insecure custom code and privilege misuse can go undetected until critical operations are affected. Earlier detection helps organisations prioritise action and strengthen control over SAP environments.

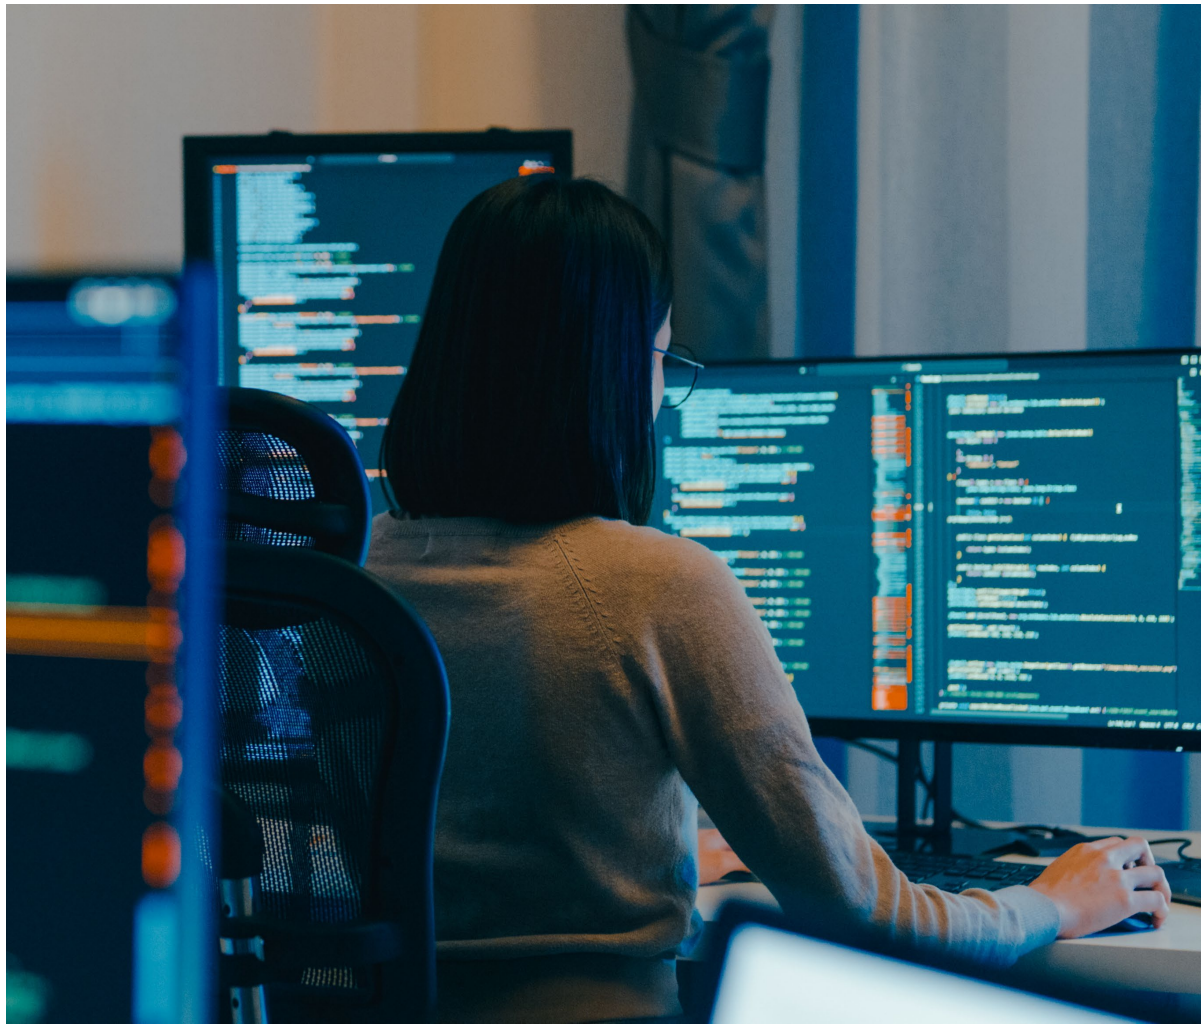
© 2026 KPMG Services Pte. Ltd. (Registration No: 200003956G), a Singapore incorporated company and a member firm of the KPMG global organization of independent member firms affiliated with KPMG International Limited, a private English company limited by guarantee. All rights reserved.

What it does: Strengthen control across critical SAP operations

Identify SAP security risks earlier
Prioritise vulnerabilities before they affect critical processes.

Detect suspicious and privileged activity
Respond earlier and reduce business impact.

Maintain continuous security visibility
Strengthen resilience and compliance with less manual effort.



Benefits

- Stronger protection for critical SAP processes
- Less disruption from security incidents
- Faster remediation through risk-based prioritisation

How it works: Demo

Input

SAP custom code, configurations, vulnerabilities, privileged access and system activity.

Action

The platform continuously assesses security posture, detects threats and prioritises identified risks.

Output

Teams gain a single view of SAP security through a central dashboard.

Impact

Organisations can address critical exposures earlier and strengthen resilience.
